INTRODUCTION

Cleanhome. As a convenient service platform, Cleanhome provides a one -stop housekeeping service for people's daily life, including cleaning, maintenance, gardening and other services.

Problem Statement

There are many problems with traditional Housekeeping services, such as difficulties make a appointment and guaranteeing service quality.

Aa one-stop service platform, we can solve most user needs, not just cleaning.

Project Description Summary

Project Name:	Cleanhome
Team:	Boyi Zhang
Project Description:	<p>Housekeeping services can be booked at your available times with free cancellation and changes</p> <p>For customers who book housekeeping the Cleanhome is a web app that Easily book housekeeping services unlike Traditional phone calls to book housekeeping services, available time also needs to be discussed by phone our application Not only are the available times obvious, but they can be changed and canceled at any time for free. We also provide user feedback to improve the quality of our services.</p>
Benefit Outcomes:	<ol style="list-style-type: none">1. Users can book services according to their favorite date and time2. Just click on the service you need to see the available time and make a choice3. Free changes and cancellations

Location: New York, NY

Job: Bank employee

Salary: \$48,000-\$60,000/year

Family: Lives with his girlfriend and a dog

Profile

As a fresh graduate, he needs to go to the bank to work on time every day. But sometimes because of work, it is necessary to exchange to a bank in another place. Her girlfriend is studying at NYU. He and his girlfriend live in a rented house in New York. They have a dog together.

+

Frustration

- Moving and cleaning is too tiring, he doesn't want to do it himself

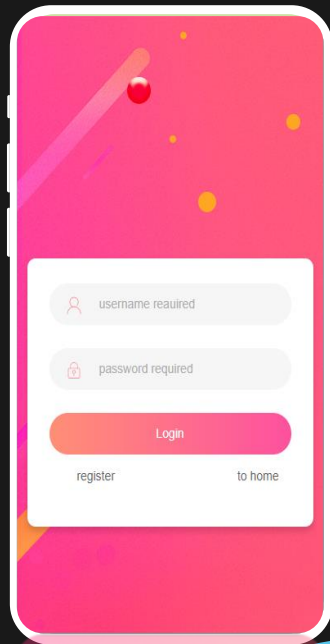

+

Goals

- Need cleaning service after they move
- Clean the newly rented apartment

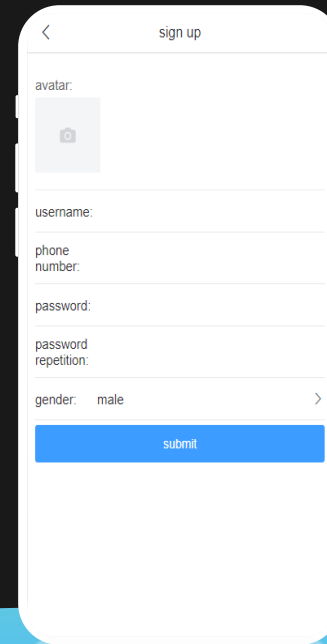

MVP DEMO

Login page

A mobile app login screen with a pink and orange gradient background. It features a white login form with two input fields: 'username required' with a person icon and 'password required' with a lock icon. Below the fields is a pink 'Login' button. At the bottom of the form are two links: 'register' and 'to home'.

Signup page

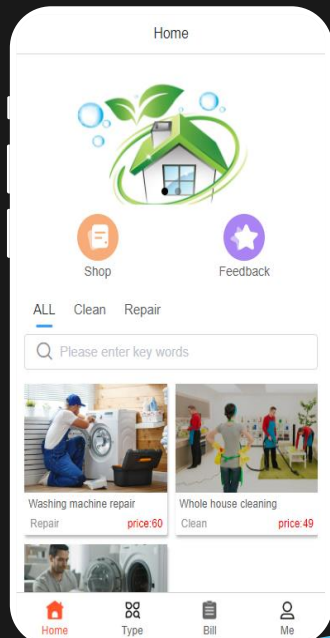

A mobile app signup screen with a white background. It features a 'sign up' header with a back arrow. The form includes an 'avatar' section with a camera icon, followed by input fields for 'username', 'phone number', 'password', and 'password repetition'. A 'gender' section shows 'male' with a right arrow. A blue 'submit' button is at the bottom.

Test Case

User Story ID	Unit to test	Assumptions	Test data	Expected Result
US-2	Login	Users can log in through the registered account and password	Username: Boyi Password:123456	Successfully entered the homepage
US-2	Login	Check if the password is correct when the user logs in	Username: Boyi Password:12345678	Password error is displayed
US-7	Homepage	Find the service you need through the search bar on the Homepage	Whole house cleaning	Successfully showing whole house cleaning services
US-7	Homepage	Services should be categorized and arranged		Check if the classification of the service is correct
US-9	Favs	Click Favorite on a certain service interface, Favs can display this service		After clicking Favorite, Favs successfully displays this service
US-12	Order	Users can cancel the order in the order interface		The order is deleted after the user cancels the order
US-3	Person Info	Users can change their avatar on the personal information interface	Image	After the user updates the avatar, the latest avatar is displayed on the personal information interface
US-14	Feedback	Users can give feedback after the order is completed	text	Users can view their own feedback by themselves, and administrators can see feedback in the backend
US-15	Payment	Users can make online payments		Users can recharge with payment methods such as bank cards
US-15	Payment	After payment, the balance is updated		Check if the balance is correct after paying for the order
US-1	Sign up	The user registers an account by entering the necessary information	Username: any Password: any phonenumber: any	After registration, use login to successfully enter the Homepage
US-1	Sign up	When registering, check whether the username is duplicate	Username: Boyi	Duplicate Username is displayed under the username
US-24	Logout	Users can log out in the personal interface		Successfully return to the login interface after the user logs out
Task	Backend	Add users, delete users and change user information		Check if user information is updated or deleted
Task	Backend	Check the user information and confirm that it is correct	Username: Boyi Password:123456	Compare with my personal account information and check if I can view all users
Task	Backend	Check the order information and confirm the operation authority of the order		Confirm whether the order information is consistent and change or delete the order information, check whether it is updated
Task	Backend	Check the feedback information		Ability to view feedback from all users
Task	Backend	The backend should have a search function for all users and orders etc.		Run a search on each item to check if the information matches

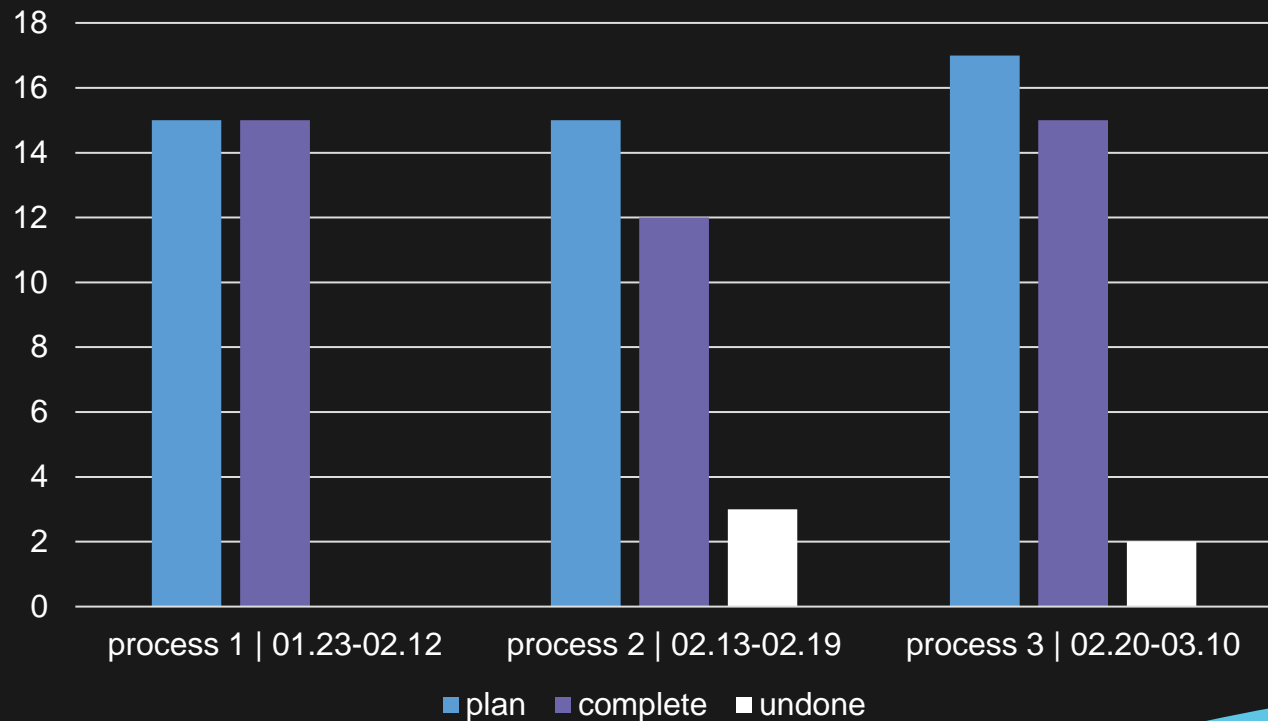

Sprint 1 backlog

serial number	Role	Requirement	Reason	Status	Place
15	Customer	I want to be able to pay in the app	Simple payment, no need to prepare cash	in progress	Payment
16	Customer	I want to check my account balance	confirm how much money i have	in progress	Payment
22	Customer	I would like to receive an SMS or email to confirm my order information	have a written booking instrument	in progress	Order
27	Customer	I want to save my payment method	Convenient for next payment	in progress	Payment

Program Completion

Total: 47
Complete: 42
Undone: 5
task completion: 89%

■ complete ■ undone

What went well?

- ✓ Completed most of the mission plans
- ✓ Followed the rules of agile programming
- ✓ Minimal Viable Product achieved

what can be improved?

Keep the version update on github

make the plan better

Complete the plan on time

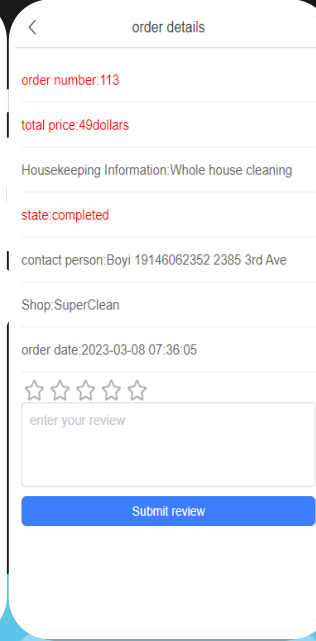

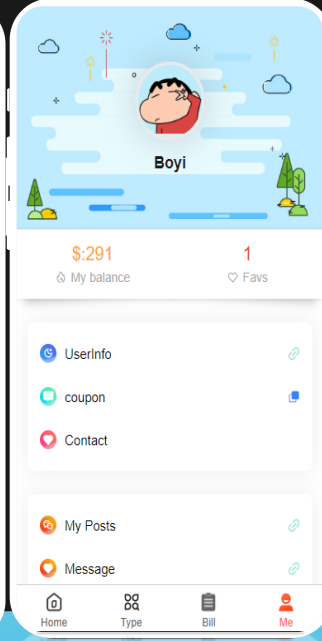

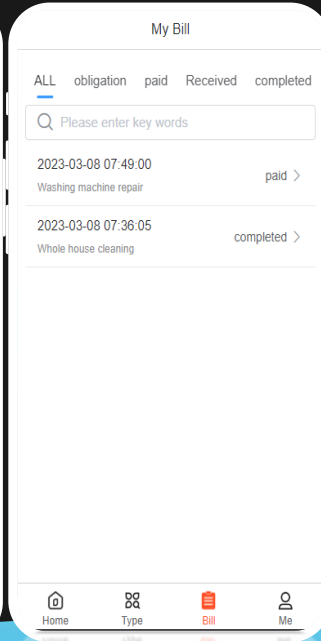

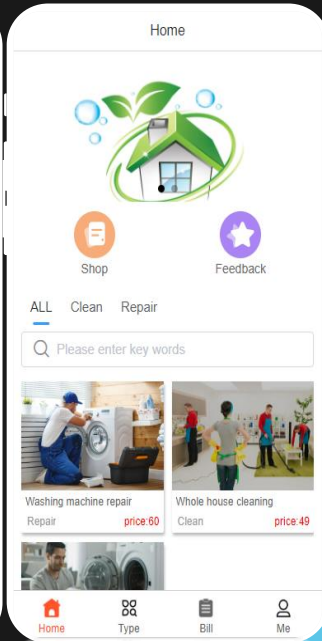

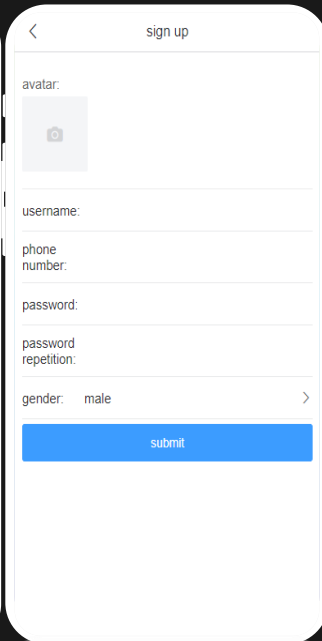

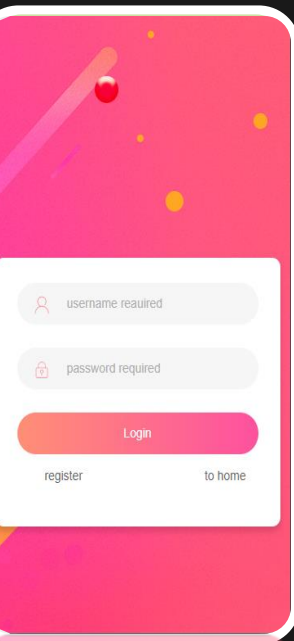

What to do next?

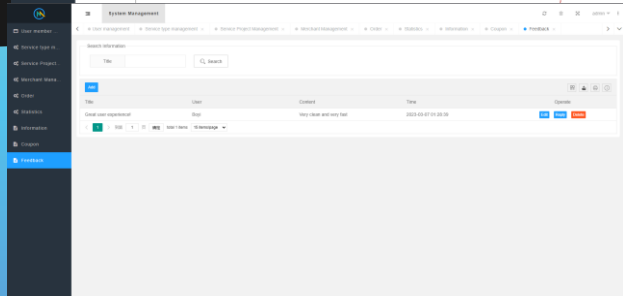

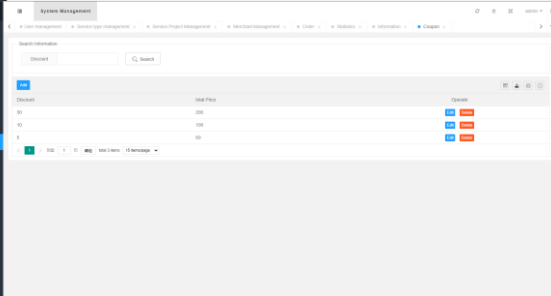

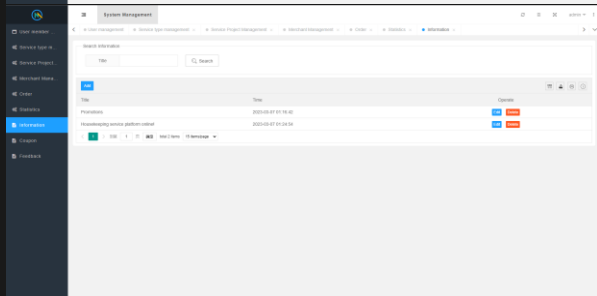

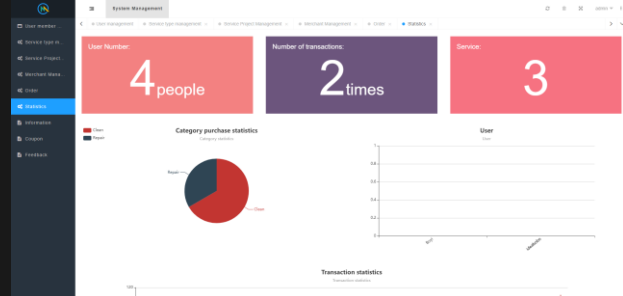

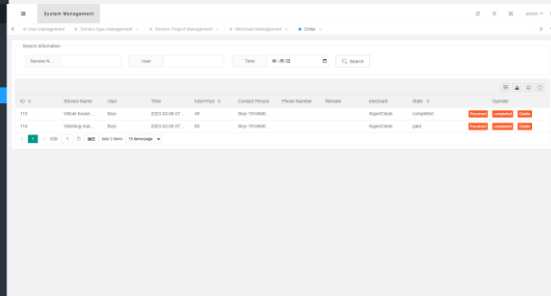

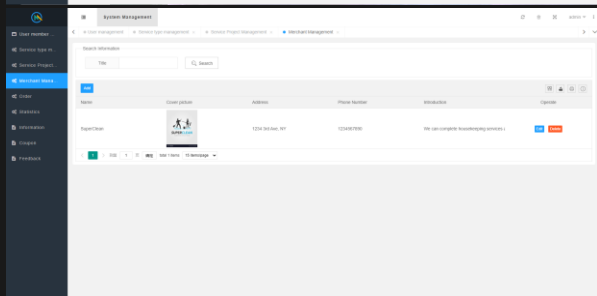

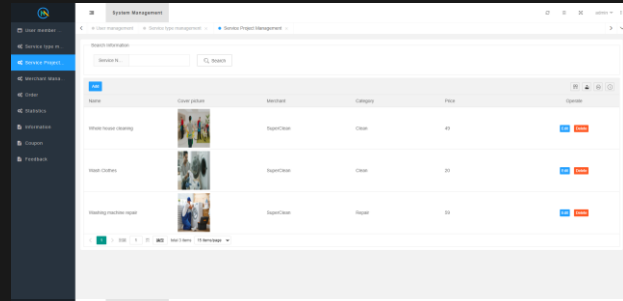

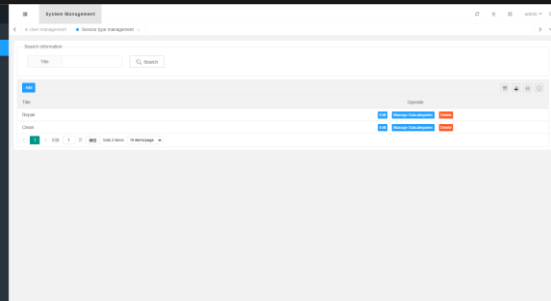

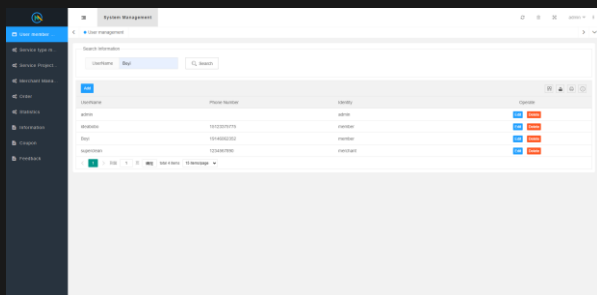

- ✓ Analyze User Behavior Habits with ML
- ✓ Complete previous unfinished tasks
- ✓ Optimize project UI and functions
- ✓ Planning for Sprint 2 with paper work
