CleanHome Installation Manual

Run Front-End

1. Clone Repository

2.

3. cd to the app folder
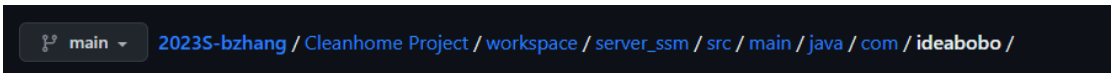

4. Run in browser (As a developer, the tool used is Hbuilder X, and the browser is Google Chrome.)

5. http://localhost:8080/

Run Back-End

1. Clone Repository

2.

3. cd to the ideabobo folder

4. Found the GeneratorApplication.java

5. Run GeneratorApplication.java (Recommended Tool – Eclipse)

6. When you see this, it means the backend is running successfully.

```
Action:

Verify the connector's configuration, identify and stop any process that's listening on port 8088, or configure this application to listen on another port.
```

7. http://localhost:8088/
